## APPLICATION FOR LIBERTY SWING KEY

| I have done this on many occasions and the user gets a great benefit.<br>With some electric wheelchairs, the battery may prevent the chair from going as far back into<br>the capsule as required. More space can be achieved by lifting the fold down seat into the<br>'up' position.<br>There could be times when a wheelchair may appear not to fit entirely into the capsule, e.g.<br>the front wheels may be over the connecting point of the on/off device and the capsule.   |
|---|
|   |
| <ul><li>"The Liberty Swing can be used for a wheelchair containing a person in a lying position where the legs of the chair are straight out and the body of the person in the wheelchair is at an angle of about 30 to 35 degrees.</li><li>You may find that the pegs that hold the head support that is attached to the chair are long, so you may have to lift the head (wheelchair) support up and over the back of the capsule. This will keep the rear wheels of the wheelchair off the floor of the capsule about 1 to 2 inches (2.54cm to 5.08cm) but with the wheels locked back into place, there is not a problem.</li></ul> |
